

total rehab at home
physical, occupational, and speech therapy

Company Overview

Mission

Provide quality rehabilitation to patients at home with Medicare Part B

Location

Based in Elkton, Maryland, Total Rehab at Home offers in-home therapy to patients in Cecil, Harford and surrounding counties

Therapy Services

Physical, occupational and speech therapy services including therapeutic exercise, balance, coordination postural training, wheel chair training, gait training, prosthetic training, joint mobilization, cognitive skills development and language training

Treatment Areas

Treatment areas include abnormality of gait, generalized weakness, ADL dysfunction, loss of balance, Alzheimer's disease, COPD, osteoporosis, dysphagia, lack of coordination, deconditioning, degenerative joint disease, dementia, contractures, Parkinson's disease, aphasia and voice disturbance

Safety Training

Therapists work with patients and caregivers to evaluate the home environment and assess the need for assisted living devices. Therapists provide training on how to live safely within the home and how to use devices such as power wheel chairs.

Therapists

Highly trained therapists have extensive experience in physical, occupational and speech therapy services and offer patients personalized patient care in the comfort of the home or assisted living facility.

Medicare Part B

In-home therapy is a covered benefit under Medicare Part B. Medicare patients who are not classified as homebound and do not need nursing care are eligible for Medicare Part B coverage.

Getting Started

Improve the quality of life for you or your loved one by calling Total Rehab at Home at 410-392-2731 for a referral. Medical providers can download a RX referral form at www.totalrehabathome.com.
